

# Material Science & Nanotechnology

June 08 – 10, 2020, Beijing, China

Theme : Lets be part of our Exploration journey in the space of physical sciences—defining & creating new way of making living.

## ABOUT MATERIAL SCIENCE & NANOTECHNOLOGY

Pride Conferences takes great pride in organising and inviting all the global delegates, to participate and contribute effectively to all the conferences organised by us. These conferences would comprise of Eminent stake holders keynote presentations, elaborative scientific research detailing, years of research works with the roadmap, Q & A, exhibitions of research papers and more. Key Stake holders include researchers, practitioners, students, professors, business communities and lot more. We create an ecosystem that enables the research works to be presented to right audience to take the Innovations ahead for a better society.

This International Conference on Material Science & Nanotechnology opens up the platform to showcase the advancements in physical sciences, that have a direct & an indirect impact on our daily life. Innovators would be discussing on the progress of science in Materials, products becoming efficient with their reduction in size, least human intervention to perform human activities. Event would leave with though provoking discussions, presentations, listing of innovations that can be productized and more.

10. Translaters will be available to translate all languages to english

## SCIENTIFIC SESSIONS

DAY 1	DAY 2	DAY 3
Material Science and Engineering	Big data in Materials Science	Composite Materials
Nanotechnology and Material Science	Nanomaterials & Nanocomposites	Catalytic materials
Energy Materials	Carbon Nanomaterials	Structural materials
Mining and Metallurgy	Nanomedicine & Biomedical Engineering	Fabrication
Surface Science and Engineering	Photonics	Bio Analysis
Biomaterials and Tissue Engineering	Graphene Materials & Technologies	Metals
Materials Chemistry & Sustainable Chemistry	Industrial Coating Materials	Mining
Biophysics and Systems Biology	MODCOMP	Electrolyte
Polymer Science and Materials	Ceramic Materials	Analytical Methods
Emerging Areas of Materials Science	Polymers	Fibers
